Orchard School Soil Remediation Update 2.10.20

Recent Orchard School Soil Remediation Activity

- Letter to update the community was sent out on 2.7.20
- NJDEP Signage has been installed on property
- Mulch was added to the playground as a precautionary measure and to alleviate concerns
- Historic soil testing report and other documentation was loaded onto the web-site
- Requested a public meeting with the NJDOH to scheduled as soon as possible
- Have have consulted with LAN Associates Licensed Site Remediation Professional (LSRP) to review and comment on phases WSP work. Given the scheduling constraints and prior work conducted, causing a delay in changing LSRP's at this time may impede getting the project done this summer.
- Working on parallel paths, we have met with a different recommended LSRP. While we have had discussions and they have visited the site, we await their proposal which needs to include guarantees to get the work done per February 2021 deadline.

Recent Orchard School Soil Remediation Activity

- Remedial Action Workplan is nearing completion. It will be posted on our web-site when submitted to NJDEP.
