

## Enable Password Protected Screen Saver

instructions to set a Windows 7 screen saver and to require a password:

### Windows

1. Right click anywhere on desktop
2. Click on personalize
3. Click on screen saver in the lower right hand corner of the screen
4. Click on the down triangle under the word "screen saver" to choose a pattern
5. Click on the down triangle under the word "wait" for how many minutes before the screen saver is activated.
6. Click box next to "on resume display logon screen"

Note: If having difficulty setting up please contact your school technology associate.
