## How to Enable Screensaver Password in Windows 7

## Step 1: After you are logged on to your computer, click on START (see Figure 1).

Figure 1

Step 2: Type the word screen saver (this is two words) in the search box and hit enter (see figure 2).

Figure 2

\*\*If the first two steps were done correctly, you should see Figure 3.

\*\*DO NOT PROCEDE TO THE NEXT STEP IF YOU CANNOT SEE THE PICURE ABOVE.

Step 3: This is where you would setup your screen saver password. Two adjustments on this screen.

- 1. Check the box next to "On resume, display logon screen"
- 2. Next to the word "Wait", put any number between 1-10. This is the number of minutes your computer will wait before the screen saver password will become active, if no activity is detected.
- 3. Click on apply and OK.
